

ELEVATING THE SPECTRUM
FOR INDIVIDUALS WITH AUTISM

Telehealth Opportunities

Dear Neighbor,

First, we'd like to extend our well wishes to you in these unpredictable times. Situations like these remind us of how lucky we are to live in such a caring and generous community.

During this time of disrupted schedules, school closures, and service suspensions, Ascendigo would like to offer support in any way we can. We have highly qualified staff that are eager to provide services via tele-health to ensure families have access to the support they need, and children have access to the services they depend on.

Our team specializes in autism, but our clinicians have worked in diverse settings and are happy to support all populations and needs. The following is a brief overview of services we are available to provide. Services can be provided in a consultative model, in which families/caregivers are provided with coaching to support goal implementation at home, or as direct services provided via telehealth.

Speech Language Services:

- Augmentative and Alternative Communication (AAC)
- Social skills
- Social-emotional awareness
- Articulation
- Expressive language
- Receptive language
- Literacy

Behavior Services:

- Activities of daily living
- Socially significant behaviors
- Independence
- Functional communication
- Conversation skills
- Social skills
- Training in the foundations of Applied Behavior Analysis

Recreational Therapy:

- Person-centered programming to support engagement in therapeutic recreational and leisure activities.
- Instruction on sport-specific activities (bike riding, rock climbing, etc.)

If you have any questions, or if there is a service you are looking for that is not listed, please reach out. If we cannot provide the service, we would be happy to share any resources we may have or point you in the direction of other service providers that may be able to help.

Thank you, and be well,
Michael Pittinaro, M.Ed., BCBA
Director of Clinical Services
Allison Mincks, M.S., CCC-SLP
Assistant Director of Clinical Services
