ASCENDIGO
ELEVATING THE SPECTRUM
FOR INDIVIDUALS WITH AUTISM

Seizure and Retention Harness Policy

Any participant who has experienced a seizure in the past 3 years is required to wear a retention harness on the chairlifts while skiing/riding with Ascendigo.
If the participant or parent/legal guardian wishes to opt out of wearing the harness, they must provide a written and signed release from the participant's primary physician and sign the Additional Retention Harness Waiver. This physicians release must specifically include information regarding the necessary elapsed time from the participant's last seizure to be considered safe enough to decline wearing the retention belt.

Signed physician's release and Additional Retention Harness Waivers should be submitted to malam@ascendigo.org.
